

COLLAPSED LUNG?

Drain Easy with SINAPI

KEY BENEFITS

1. Product Safety
2. Drainage Efficiency
3. Early Patient Mobilization
4. Easy Operation
5. Cost-Saving

KEY SPECS

- Silicone Material Tubing
- Schaeffler Valve
- Ball Movement for Air Leak Intensity
- 25ml or less water to use
- Compact Construction

1 Product Safety

- No clamping needed
- No backflow
- Built-in suction regulator for both high positive pressure valve and high negativity vent
- No exposure to bodily fluids at any time
- Provides feedback on actual suction strength

2 Drainage Efficiency

- Minimal dead space (60ml) within collection chamber for faster regeneration of negative intra-pleural pressure during the breathing cycle = earlier catheter removal.
- Very low opening pressure (1cmH20) of valve for low resistance to flow despite the amount of fluids drained = high efficiency of air or fluid drainage from the chest.
- Confirmed suction action via in-line manually depressed suction bulb = safe disconnection of patient from vacuum source for early mobilization.

3 Early Patient Mobilization

- Light and compact construction for easy carry
- Orientable in any direction
- Wearable via shoulder sling shot

4 Easy Operation

- Easy to set up
- Allows for easy milking of tube
- No fear of backflow
- Drain via built-in tap
- Built-in bed hooks (for some models)
- Little maneuvers needed to monitor and manage

5 Cost-saving

- Only one unit for patient's hospital stay
- Efficiently evacuates fluids/air for shorter hospital stay
- Closed system with amenities for less patient complications
- Space saver in medical waste containers

Definitely
Better Patient Outcome
Secure & Safe!

FEATURES:

- A** Horizontal Hanger Stabilizer
- B** Compact Hanger
- C** Suction bulb applies manual suction
- D** Red bellows provides visible feedback of actual suction applied
- E** Innovative spillage protection
- F** Air leak indicator
- G** Accurate volume measurement
- H** Needle free sampling port
- I** Large diameter drainage tap

J Drainage bag with bayonet connector

PRODUCT RANGE

XS50 - Outpatient

XL200S - Pediatric Suction Control

XL200SC - Pediatric Suction Control & HNV

XL1000SC - Cardiac Suction Control & HNV

XL2000S - Cardiac Suction Control & HNV

XL2000SD - Cardiac Suction Control & HNV

D001 - Drainage Bag

ACCESSORIES:

Stand | Shoulder Sling | Y-Connector | Drainage Bag (D-001)

Seq	Item Code	Product Name / Description	Patient Age	Apt For	To Remove	Holds (ml)	Tube Length (m)	Suction Control	Tube Roller	Inlet Qty.
